

## **Troop T Shirt Instructions**

Supplies to buy(Mine came from Joann Fabrics)

1. Light blue t-shirt
2. Iron-on **Dark T-Shirt Transfer for ink jet printers**

Following the instructions on the transfer paper, print the design from page two onto the transfer paper. You might want to do a test print on regular paper first. It should print out 7 ½ inches in diameter.

Next carefully cut around the design, cut just inside the outer black circle. Cut off the outer black circle. This will leave a white boarder around the design.

Following the instructions on the transfer paper, iron the transfer onto the shirt. The transfer goes on the front, and the top of the transfer should be 3 ½ inches down from the top of the collar. You will need to measure carefully from side-to-side to get the transfer centered.
